

AR 710

AUG. 16 1984

Mr. Craig Campbell
Naval Facilities Engineering Command
P. O. Box 30466
Charleston, SC 29411

Dear Mr. Campbell:

As outlined in Executive Order 12044, the Environmental Protection Agency (EPA) is directed to monitor Federal facilities compliance with existing and proposed pollution control requirements for all media. In a continuing effort under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) to assess the Federal facilities in Region 6, we are very interested in obtaining the information on the Navy installations currently being assessed under the Navy Assessment and Control of Installation Pollutants (NACIP). EPA has only limited information about NACIP and asks that you send information that would give a more detailed understanding about the program.

Of the seven Navy installations identified in Region 6, we have yet to receive "Initial Assessment Study" reports on six of these sites (see table A). EPA hopes to receive these reports by the dates (month and year) noted in table A. If this initial phase of the IPP cannot be completed within the timeframe noted, please provide us with a scheduled completion date (month and year).

For the remaining facility we have received a "Confirmation Study" Report (see table B). Please provide us with a schedule of the completion dates (month and year) for the advanced phases of the NACIP at this site.

It should be stressed that steps need to be taken to provide sufficient funding for these facilities to ensure the timely completion of the IPP at each of these sites. It should also be noted that if conditions develop that delay or prevent the assessment of these facilities within a reasonable timeframe, EPA may employ the services of regional contractors to conduct investigations at these facilities.

9491099

We request your cooperation in addressing these questions and we will be happy to discuss this matter in more detail.

Sincerely yours,

/s/ Samuel Nott
